# Culver's Share Night!

A percentage of the proceeds of that night will come to the *Richland County HCE* for scholarships, programs, etc.

Come to help us serve or Come for dinner!

July 25th, 2018

4:00 p.m. - 8:00 p.m.

#### Hello HCE Members!

We have had a busy Spring and Summer! The Richland County HCE members have once again outdone themselves in community service. Our members made newborn caps and blankets, taught crafts to the elderly in nursing homes, raised money for our high school scholarships, donated crafts and items for a silent auction, and served food at a cancer walk. In July, our members will deliver food to tables and Culvers donates money to our scholarship fund.

We are involved in the "Get Real" program to teach high school students how to budget and balance a checkbook. It is a popular program with the students and we enjoy sharing our knowledge and serving our future doctors, lawyers, farmers, etc.

We have a booth at the Master Gardener Show at the Richland County UW campus. Members donate bulbs, flowers, plants, gardening items to sell and the money is used for scholarship awards.

Your Executive Board sent 4 members to participate in the SW District Spring meeting. The programs offered were a class on "Monarch Butterflies" and "Essential Oils".

We are getting ready to enter items in Cultural Arts Show in July. The winners will go to the State Convention in September.

It is a shame our membership is going down in our clubs. As our membership gets older, we lose members. We all need to realize someday we might not have the wonderful women of HCE who selflessly give of their time and money to help others. Get involved and ask a friend, a relative, a neighbor to join HCE. Bring them to a meeting and let them experience the "HCE MAGIC".

Sincerely, Yvonne Chapman, Richland County HCE President

#### **Summer Greetings!**

I hope everyone is enjoying this busy season of gardens, family, and community activities! Just try not to over-doit in the heat, ok?

My summer programs include continued work with community groups dedicated to making Richland County healthier: Richland FIT and RCCFAC (Richland County Children and Family Advocacy Council).

One area of growing interest is "ACEs" or Adverse Childhood Experiences. We are learning that "the welfare of our boys and girls, our nation's greatest asset" rings true in many ways. Whatever we can do to protect and support youth increases their wellbeing for a lifetime. Sometimes this takes the shape of supporting the parents, too. I think about your gifts to new mothers, both here and abroad, as one way to show them that community cares.

I enjoyed visiting with many of you at the Spring Fling in May. Thank you, Yuba for being a wonderful host, as always. It was fun to hear about the International Student Exchange program from the 2 young ladies who joined us. I was fascinated and honored to learn the personal history of Ann Cunningham who emigrated to Sauk County Wisconsin from Germany shortly after World War II. We are lucky to have this courageous lady as one of our HCE Members in the County Liners club.

Thank you to everyone for all you are doing in our communities, both "then" and "now". I hope to see you soon.

## **ACE's—Adverse Childhood Experiences**

May 21, 2018

By Chelsea Wunnicke

Interest in the topic of ACEs (Adverse Childhood Experiences) continues to grow in Richland County, as more community members have learned about their connection to health. Richland County UW-Extension and UW-Richland Continuing Education recently hosted a full day "Wisconsin ACE Interface" training at UW-Richland with Peter Daniels as the speaker. Daniels is a trained facilitator through Saint A and currently works at the Family and Children's Center in Viroqua. He has a history of working with youth as an educator in many different communities. Daniels explained how childhood experiences can impact brain development and affect a person's risk for health and social problems. The event drew a large crowd, consisting of staff from area schools, Health & Human Service Professionals, Domestic Abuse Prevention Advocates, youth mentors, and interested community members. Participants learned the history of the ACE study and its findings; the effect that abuse, trauma, neglect, and family dysfunction have on brain development; and how to build self-healing communities. They engaged in discussion and activities to connect the information to their work and lives.

The original ACE study team in the 1990s (Dr. Robert Anda & Dr. Vincent Felitti) surveyed 17,000 participants. They found that people with adversity in early life, or higher "ACE scores," have higher risk for physical, mental and behavioral problems later in life. Attributable problems include diseases, mental health issues, social problems, and early death. There is also a higher risk for domestic violence, mental illness, substance abuse, child abuse and neglect.

Further study in these areas are continuing to reveal how specific types of trauma at developmental milestones affect the brain. For example, neglect in infancy can do predictable harm to the corpus callosum, an area of the brain that helps the Left and Right hemispheres communicate. "Less cross-brain communication can lead to an inability to integrate rational ideas when in a highly emotional state. You may know someone who doesn't seem able to respond when you ask him or her to calm down so you can talk through a problem. This may not be a choice; it may be a biological adaptation to childhood experience," said Daniels.

The goal of the Wisconsin ACE Interface is to raise awareness about ACEs and give communities tools to respond. Communities have the ability to shift the dynamics that can lead to high ACE scores. As part of the training, Richland County participants generated a list of "What's Next" and many are interested in further training on Trauma Informed Care and community strategies to reduce the experience of toxic stress in families.

Peter Daniels has offered to continue working with Richland County to mobilize around reducing ACEs and fostering a community where everyone can thrive. Community members who are interested in this work can contact UW-Extension Family Living Agent, Chelsea Wunnicke at 608-647-6148 or go to <u>richland.uwex.edu</u> for more information.

People who report higher ACE scores are more likely to have health and social problems – in fact, as the ACE Score goes up, the percentage of people with health and social problems also goes up.
